

SCHOOL OF PUBLIC POLICY

PROGRAM FOR PUBLIC CONSULTATION

HEALTHCARE COSTS

- STATE OF MICHIGAN, CD4, CD7, CD8, CD10 and NATIONAL -

Field Dates:

Michigan CD4, Michigan CD7, Michigan CD8, Michigan CD10: May 27 – June 25, 2026

National: February 11-26, 2026

Sample Sizes:

State of Michigan: 600 **Michigan CD4:** 461 **Michigan CD7:** 469 **Michigan CD8:** 451

Michigan CD10: 494 **National:** 2,509

Confidence Interval:

State of Michigan +/-4.2% **Michigan CD4** +/-6.7% **Michigan CD7** +/-6.4% **Michigan CD8** +/-7.2%

Michigan CD10: +/-6.4% **National:** +/- 2.9%

Samples Provided by: Multiple online opt-in panels, including Cint, Dynata and Prodege. Sample collection and quality control was managed by QuantifyAI under the direction of the University of Maryland's Program for Public Consultation.

Note: Rows may not add to 100% due to rounding

[Q13-17, 37-43 previously released]

[Q9-12, 18-24, 26-36, 44-59 withheld for future release]

We are going to share with you some proposals that have been put forward that have the goal of reducing the price of drugs. For each one, please select whether you favor or oppose it.

Q1. As you may know, many drug companies charge a higher price for drugs in the US than in other developed countries. To ensure that prices are not higher in the US, it has been proposed that the federal government set maximum prices based on what the drugs are sold for in other developed countries.

When a company develops a new drug, they can get a patent so that they are the only company that can sell the drug for up to 20 years. Some drug companies have been extending the amount of time their drug has no competition by paying other generic drug companies to hold off selling the drug, enabling the original patent holder to continue to charge higher prices.

Q2. Here is a proposal: Make it illegal for drug companies—whose patent on a drug has come to an end—to pay generic drug companies to hold off making and selling that drug.

As you may know, some patented drugs have been developed with the aid of federal funding.

Q3. Here is a proposal: In the event the federal government:

- determines the price of a patented drug is unaffordable to some or most of the people that need it,
- and that drug was developed with the aid of federal funding,

the federal government will override the drug company's patent and license other companies to produce the drug.

Michigan CD10	75%	25%	0%

Republicans	70%	30%	0%
Democrats	80%	20%	0%

Q8. As you may know, a law was passed in 2021 which temporarily increased subsidies for health insurance in the ACA marketplace. Recently, those increased subsidies were ended, thus raising the healthcare costs (premiums and deductibles) for households on ACA insurance.

Here is a proposal: Renew the increased subsidies for ACA health insurance, so that low- and middle-income households on ACA will not have a major increase in health insurance costs.

	Favor	Oppose	Ref/DK
National	81%	19%	0%

Republicans	81%	19%	0%
Democrats	86%	14%	0%

Q25. There has been a debate about how much the Federal government spends on Medicaid, the program for people with low incomes. If spending on Medicaid is reduced, this would result in fewer people being covered by Medicaid. If spending on Medicaid is increased, this would allow more people to be covered by Medicaid.

Thinking about federal spending on Medicaid over the last few years, do you think spending should be:

	Increased a lot	Increased some	Increased a little	Increased	Kept the same	Reduced	Reduced a little	Reduced some	Reduced a lot	Ref/DK

Methodology

Fielding and Sample Size: The surveys were fielded by the Program for Public Consultation (PPC) at the University of Maryland's Civic Innovation Center, with representative non-probability samples obtained from multiple online panels, including Cint, Dynata and Prodege.

National

Field Dates: February 11-26, 2026 Total Sample Size: 2509 Response Rate: 7.6%
Four-fifth Sample Sizes: 1991 to 2020

State of Michigan

Field Dates: May 27 – June 19, 2026 Sample Size: 600 Response Rate: 7.2%

Michigan CD4

Field Dates: May 27 – June 19, 2026 Sample Size: 461 Response Rate: 7.6%

Michigan CD7

Field Dates: May 27 – June 25, 2026 Sample Size: 469 Response Rate: 8.2%

Michigan CD8

Field Dates: May 27 – June 24, 2026 Sample Size: 451 Response Rate: 8.0%

Michigan CD10

Field Dates: May 27 – June 24, 2026 Sample Size: 494 Response Rate: 8.9%

Pre-Stratification and Weighting: The samples were pre-stratified and weighted by age, race, ethnicity, gender, educational attainment, household income, and home ownership. Benchmarks were obtained from the Census Bureau's 2024 and 2025 American Community Surveys, as well as the 2024 Current Population Survey's Annual Social and Economic Supplement.

The national sample was also weighted by Census region and partisan affiliation. In the Michigan samples, the distribution of partisan affiliation was within expectations, based on voter registration data for non-leaners and/or Cook's Partisan Voting Index for leaners.

National

Confidence Interval of Four-fifth Samples: +/-2.9% Min Weight: 0.25 Max Weight: 2.51 Mean Weight: 1.0

State of Michigan

Confidence Interval: +/-4.1% Min. Weight: 0.37 Max Weight: 1.92 Mean Weight: 1.0

Michigan CD4

Confidence Interval: +/-6.7% Min. Weight: 0.07 Max Weight: 6.00 Mean Weight: 1.0

Michigan CD7

Confidence Interval: +/-6.4% Min. Weight: 0.10 Max Weight: 6.00 Mean Weight: 1.0

Michigan CD8

Confidence Interval: +/-7.2%

Min. Weight: 0.09 Max Weight: 6.50 Mean Weight: 1.0

Michigan CD10

Confidence Interval: +/-6.4%

Min. Weight: 0.09 Max Weight: 6.50 Mean Weight: 1.0

Confidence Intervals were calculated using the sample variance of the weights using the following formula:

CI = Square root ((1+variance)/sample size)

Sample Collection: Sample collection was managed by Quant-E with oversight from PPC. Samples were drawn from multiple large online panels, including Cint, Prodege, and Dynata, whose members are recruited using non-probability sampling methods. The selected sample was invited to participate via email invitation, push notification, or SMS for cell phone users. Respondents were offered cash or cash-equivalent incentives to participate in the survey.

Data Collection and Privacy: Survey responses were collected directly on the Qualtrics platform. Only respondents with a provided link could take the survey, using their computer, laptop, tablet, or mobile phone.

Privacy and security measures were taken to ensure that data was collected in adherence to the European Union's General Data Protection Regulation policies for data privacy and security, as well as the California Consumer Privacy Act (CCPA).

Quality Control: Quality control measures in the sample collection process to disqualify duplicate respondents and survey bots included:

- checking respondents' IP addresses to determine if there are duplicate respondents
- employing an "operating system & Web browser check" to determine if there are any cross-panel duplicates
- using hCaptcha to detect and disqualify survey bots.

Quality control measures within the survey to disqualify dishonest or mischievous respondents, as well as survey bots, included:

- an attention-check question, e.g. Select the word that does not belong. [Tuesday]; [Friday]; [April]; [Wednesday]
- an honesty question, e.g. What have you done in the past week? Select all that apply. [Won a gold medal at the Olympics]; [Watched TV]; [Got a license to operate a Class SSGN submarine]; [Read a book]
- a speed limit, which disqualified respondents who moved through the first quarter of the survey at a pace roughly triple the average reading speed.

Lastly, respondents were removed from the sample who answered less than half the substantive questions, or who engaged in straight-lining.
