

SCHOOL OF PUBLIC POLICY

PROGRAM FOR PUBLIC CONSULTATION

HOUSING AFFORDABILITY

- NEW MEXICO CD2 AND NATIONAL -

Field Dates:

New Mexico CD2: May 27 – June 25, 2026

National: March 11-19, 2026

Sample Sizes:

New Mexico CD2: 500

National: 1,200

Confidence Interval:

New Mexico CD2: +/-6.2%

National: +/- 2.9%

Samples Provided by: Multiple online opt-in panels, including Cint, Dynata and Prodege. Sample collection and quality control was managed by QuantifyAI under the direction of the University of Maryland's Program for Public Consultation.

Note: Rows may not add to 100% due to rounding

[Q1-12 withheld for future release]

Switching gears, you will now have the chance to evaluate federal proposals aimed at addressing the cost of housing.

For each one, please say whether you are in favor or opposed.

Q13. Providing \$25 billion to local governments to increase the amount of high-density housing affordable to low- and middle-income households.

	Favor	Oppose	Ref/DK
National	74%	26%	1%
Republicans	63%	36%	1%
Democrats	84%	16%	0%
Independents	73%	26%	1%
New Mexico CD2	77%	22%	2%
Republicans	68%	31%	1%
Democrats	87%	12%	0%

Q14. Spending up to \$40 billion to increase the amount of high-density housing (such as apartment buildings, duplexes and triplexes) affordable for people with low and very low incomes.

	Favor	Oppose	Ref/DK
National	74%	26%	0%
Republicans	64%	36%	0%
Democrats	86%	14%	0%
Independents	71%	29%	0%
New Mexico CD2	76%	24%	0%
Republicans	65%	35%	0%
Democrats	84%	16%	1%

Q15. Spending up to \$24 billion to provide more vouchers to help people pay rent who are very low income, disabled or elderly.

	Favor	Oppose	Ref/DK
National	80%	19%	1%
Republicans	74%	26%	1%
Democrats	89%	11%	1%
Independents	75%	25%	0%
New Mexico CD2	81%	19%	0%
Republicans	70%	30%	0%
Democrats	90%	10%	1%

Q16. Providing tax incentives to home builders to build or repair homes affordable to low- and middle-income households.

	Favor	Oppose	Ref/DK
National	83%	16%	0%
Republicans	80%	20%	0%
Democrats	88%	12%	0%
Independents	81%	18%	1%
New Mexico CD2	86%	12%	2%
Republicans	86%	14%	1%
Democrats	90%	8%	2%

Q17. To help reduce the price of single-family homes, prohibiting large corporations from buying new single-family homes, and requiring those that already own such homes to sell them within the next ten years.

	Favor	Oppose	Ref/DK
National	80%	20%	0%
Republicans	77%	22%	1%
Democrats	82%	18%	0%
Independents	78%	22%	0%
New Mexico CD2	78%	22%	1%
Republicans	71%	28%	2%

[Q18-36, Q44-59 withheld for future release]
[Q37-43 previously released]

Methodology

Fielding and Sample Size: The surveys were fielded by the Program for Public Consultation (PPC) at the University of Maryland's Civic Innovation Center, with representative non-probability samples obtained from multiple online panels, including Cint, Dynata and Prodege.

National

Field Dates: March 11-10, 2026 Total Sample Size: 1200 Response Rate: 8.3%

New Mexico CD2

Field Dates: May 27 – June 25, 2026 Sample Size: 500 Response Rate: 7.7%

Pre-Stratification and Weighting: The samples were pre-stratified and weighted by age, race, ethnicity, gender, educational attainment, household income, and home ownership. Benchmarks were obtained from the Census Bureau's 2024 and 2025 American Community Surveys, as well as the 2024 Current Population Survey's Annual Social and Economic Supplement.

The national sample was also weighted by Census region and partisan affiliation. In the New Mexico sample, the distribution of partisan affiliation was within expectations, based on voter registration data for non-leaners and/or Cook's Partisan Voting Index for leaners.

National

Confidence Interval: +/-2.9% Min Weight: 0.48 Max Weight: 1.92 Mean Weight: 1.0

New Mexico CD2

Confidence Interval: +/-6.2% Min Weight: 0.07 Max Weight: 5.00 Mean Weight: 1.0

Confidence Intervals were calculated using the sample variance of the weights using the following formula:

CI = Square root ((1+variance)/sample size)

Sample Collection: Sample collection was managed by Quant-E with oversight from PPC. Samples were drawn from multiple large online panels, including Cint, Prodege, and Dynata, whose members are recruited using non-probability sampling methods. The selected sample was invited to participate via email invitation, push notification, or SMS for cell phone users. Respondents were offered cash or cash-equivalent incentives to participate in the survey.

Data Collection and Privacy: Survey responses were collected directly on the Qualtrics platform. Only respondents with a provided link could take the survey, using their computer, laptop, tablet, or mobile phone.

Privacy and security measures were taken to ensure that data was collected in adherence to the European Union's General Data Protection Regulation policies for data privacy and security, as well as the California Consumer Privacy Act (CCPA).

Quality Control: Quality control measures in the sample collection process to disqualify duplicate respondents and survey bots included:

- checking respondents' IP addresses to determine if there are duplicate respondents
- employing an "operating system & Web browser check" to determine if there are any cross-panel duplicates
- using hCaptcha to detect and disqualify survey bots.

Quality control measures within the survey to disqualify dishonest or mischievous respondents, as well as survey bots, included:

- an attention-check question, e.g. Select the word that does not belong. [Tuesday]; [Friday]; [April]; [Wednesday]
- an honesty question, e.g. What have you done in the past week? Select all that apply. [Won a gold medal at the Olympics]; [Watched TV]; [Got a license to operate a Class SSGN submarine]; [Read a book]
- a speed limit, which disqualified respondents who moved through the first quarter of the survey at a pace roughly triple the average reading speed.

Lastly, respondents were removed from the sample who answered less than half the substantive questions, or who engaged in straight-lining.
