

SCHOOL OF PUBLIC POLICY

PROGRAM FOR PUBLIC CONSULTATION

Criminal Justice: Police, Prison and Criminal Records

- PENNSYLVANIA CD1, CD7, CD8, CD10 and NATIONAL -

Field Dates:

Pennsylvania CD1, CD7, CD8, CD10: July 21 – August 5, 2026

National: February 11-26, 2026

Sample Sizes:

Pennsylvania CD1: 500

Pennsylvania CD7: 503

Pennsylvania CD8: 504

Pennsylvania CD10: 501

National: 2,509

Confidence Interval:

Pennsylvania CD1: +/-5.6% **Pennsylvania CD7:** +/-6.0% **Pennsylvania CD8:** +/-6.7%

Pennsylvania CD10: +/-6.7% **National:** +/- 2.9%

Samples Provided by: Multiple online opt-in panels, including Cint, Dynata and Prodege. Sample collection and quality control was managed by QuantifyAI under the direction of the University of Maryland's Program for Public Consultation.

Note: Rows may not add to 100% due to rounding

[Q13-26 withheld for future release, Q1-12 and Q27-51 previously released]

[Police Reform]

We are now going to ask whether you favor some proposals in Congress related to criminal justice.

Here are some proposals in Congress to reform policing:

Q52. Require police departments to make it a duty for officers to intervene when they perceive another officer is using excessive force. Also, provide officers with training for when and how to intervene.

	Favor	Oppose	Ref/DK

Democrats	83%	17%	0%
-----------	-----	-----	----

Here are proposals to reform the treatment of people in prison:

First, here are proposals related to the use of solitary confinement which means putting a prisoner in a cell by themselves for 22-24 hours a day. People are put in solitary confinement for the following purposes:

- as punishment for minor or serious violations of prison rules
- for the prisoner's safety (protection from other inmates, or they are suicidal)

Currently, there are no federal laws that regulate how many days a person can be kept in solitary confinement, or for what purposes.

Proposals have been put forward to limit the use of solitary confinement.

Q59. Which do you favor:

1. Prohibit any use of solitary confinement
2. Limit the use of solitary confinement only when it is necessary for the prisoner's safety, and to no more than 15 days in a row or 20 days in a two-month period
3. Limit the use of solitary confinement as punishment for serious violations only or for their own safety, and to no more than 30 days in a row or 40 days in a two-month period
4. Do not limit the use of solitary confinement

	Prohibit solitary confinement	Limit: only for prisoner's safety, no more than 15 days in a row	Limit: only as punishment for serious violations or prisoner's safety, no more than 30 days in a row	TOTAL LIMIT USE	Do not limit	Ref /DK

[Criminal Records]

As you may know, there are negative consequences to having a criminal record that go beyond serving time in prison, including difficulty getting a job, a license to practice a trade, and housing. In many states, a person can be disqualified – have their application rejected, or get fired or evicted – because of their criminal record.

Proposals have been put forward to limit these negative consequences of having a criminal record.

Do you favor or oppose prohibiting employers and licensing boards from disqualifying a person on the basis that they were:

Q60. arrested but not charged, or charged but not convicted

Republicans	54%	45%	2%
Democrats	60%	40%	0%

Here are other proposals to limit the negative consequences of having a criminal record. For each, please say whether you favor or oppose.

Q63. Limit the period of time during which employers and licensing boards can disqualify a person for certain convictions:

- for a misdemeanor, one year after they complete their sentence
- for a felony, five years after they complete their sentence.

Methodology

Fielding and Sample Size: The surveys were fielded by the Program for Public Consultation (PPC) at the University of Maryland's Civic Innovation Center, with representative non-probability samples obtained from multiple online panels, including Cint, Dynata and Prodege.

National

Field Dates: February 11-26, 2026 Total Sample Size: 2509 Response Rate: 7.6%
Four-fifth Sample Sizes: 1991 to 2020

Pennsylvania CD1

Field Dates: July 21 – August 3, 2026 Sample Size: 500 Response Rate: 8.6%

Pennsylvania CD7

Field Dates: July 21 – August 5, 2026 Sample Size: 503 Response Rate: 8.7%

Pennsylvania CD8

Field Dates: July 21 – August 4, 2026 Sample Size: 504 Response Rate: 8.2%

Pennsylvania CD10

Field Dates: July 21 – August 1, 2026 Sample Size: 501 Response Rate: 7.4%

Pre-Stratification and Weighting: The samples were pre-stratified and weighted by age, race, ethnicity, gender, educational attainment, household income, and home ownership. Benchmarks were obtained from the Census Bureau's 2024 and 2025 American Community Surveys, as well as the 2024 Current Population Survey's Annual Social and Economic Supplement.

The national sample was also weighted by Census region and partisan affiliation. In the Pennsylvania samples, the distribution of partisan affiliation was within expectations, based on voter registration data for non-leaners and/or Cook's Partisan Voting Index for leaners.

National

Confidence Interval of Four-fifth Samples: +/-2.9% Min Weight: 0.25 Max Weight: 2.51 Mean
Weight: 1.0

Pennsylvania CD1

Confidence Interval: +/-5.6% Min Weight: 0.14 Max Weight: 5.53 Mean
Weight: 1.0

Pennsylvania CD7

Confidence Interval: +/-6.0% Min Weight: 0.13 Max Weight: 6.50 Mean
Weight: 1.0

Pennsylvania CD8

Confidence Interval: +/-6.7% Min Weight: 0.11 Max Weight: 6.50 Mean
Weight: 1.0

Pennsylvania CD10

Confidence Interval: +/-6.7%

Min Weight: 0.05

Max Weight: 6.50

Mean

Weight: 1.0

Confidence Intervals were calculated using the sample variance of the weights using the following formula:

$CI = \text{Square root } ((1+\text{variance})/\text{sample size})$

Sample Collection: Sample collection was managed by Quant-E with oversight from PPC. Samples were drawn from multiple large online panels, including Cint, Prodege, and Dynata, whose members are recruited using non-probability sampling methods. The selected sample was invited to participate via email invitation, push notification, or SMS for cell phone users. Respondents were offered cash or cash-equivalent incentives to participate in the survey.

Data Collection and Privacy: Survey responses were collected directly on the Qualtrics platform. Only respondents with a provided link could take the survey, using their computer, laptop, tablet, or mobile phone.

Privacy and security measures were taken to ensure that data was collected in adherence to the European Union's General Data Protection Regulation policies for data privacy and security, as well as the California Consumer Privacy Act (CCPA).

Quality Control: Quality control measures in the sample collection process to disqualify duplicate respondents and survey bots included:

- checking respondents' IP addresses to determine if there are duplicate respondents
- employing an "operating system & Web browser check" to determine if there are any cross-panel duplicates
- using hCaptcha to detect and disqualify survey bots.

Quality control measures within the survey to disqualify dishonest or mischievous respondents, as well as survey bots, included:

- an attention-check question, e.g. Select the word that does not belong. [Tuesday]; [Friday]; [April]; [Wednesday]
- an honesty question, e.g. What have you done in the past week? Select all that apply. [Won a gold medal at the Olympics]; [Watched TV]; [Got a license to operate a Class SSGN submarine]; [Read a book]
- a speed limit, which disqualified respondents who moved through the first quarter of the survey at a pace roughly triple the average reading speed.

Lastly, respondents were removed from the sample who answered less than half the substantive questions, or who engaged in straight-lining.
